Date: 2021-12-14
Subject: SCG Platform East1 (APAC)

RELEASE NOTES

Release East1 (APAC) 2021-12-14

Domain name change

Following the name change of our company from DNV GL to DNV the domains for our Smart Cable Guard (SCG) servers are now also changed from dnvgl.com to dnv.com. The new addresses are:

- For the SCG website: https://east1.scg.dnv.com/
- For the Control Unit configuration during new installs, the new server address on the Network tab is: `cfe-east1.scg.dnv.com`

Improvements

- New identity provider allowing in the future more flexibility in managing users and roles:
    - For users logging in the SCG website there is no change
    - For applications using the SCG API a small action is required. Details are communicated to users of the SCG API.
- Performance of operational status warnings for SCG systems. To be able to cope with the growing number of installed SCG systems the speed of the service providing the operational status warnings for SCG systems is increased.

Fixed issues

- Various small bug fixes
