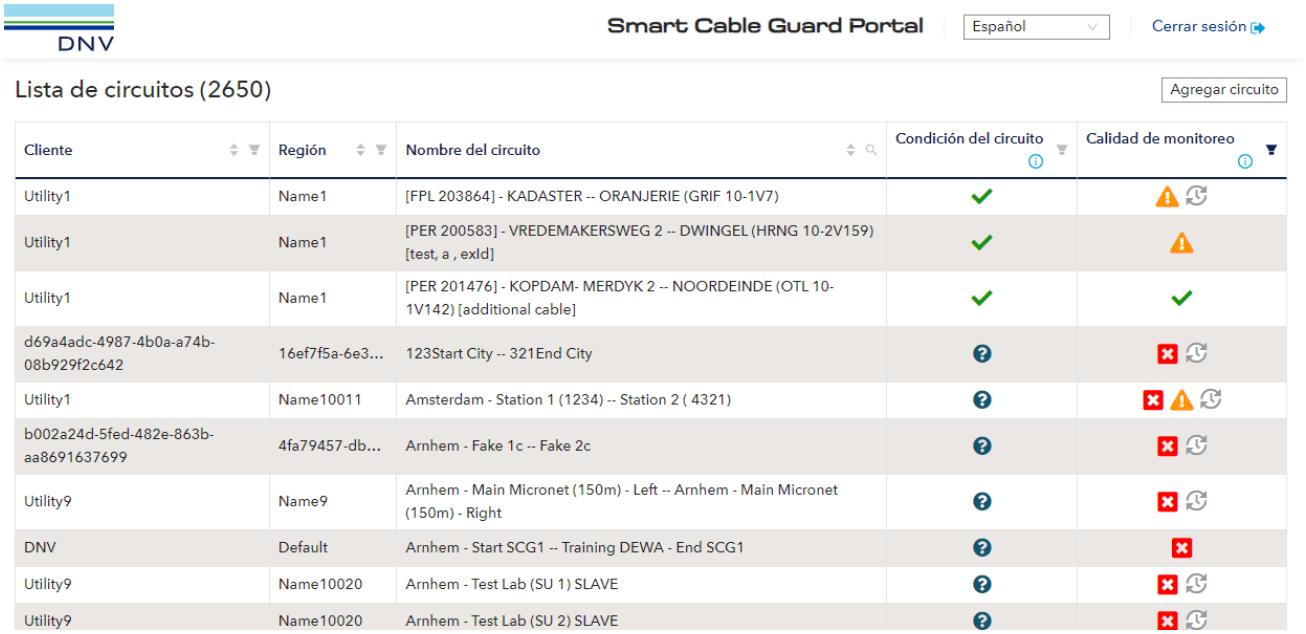
# SCG PLATFORM RELEASE NOTES
Release r132

## New features and changed features

- **Spanish translation** – All the content in CWI, Portal, fault emails, and SMS are available for Spanish speaking customers.



| Cliente | Región | Nombre del circuito | Condición del circuito | Calidad de monitoreo |
|---|---|---|---|---|
| Utility1 | Name1 | [FPL 203864] - KADASTER -- ORANJERIE (GRIF 10-1V7) | | |
| Utility1 | Name1 | [PER 200583] - VREDEMAKERSWEG 2 -- DWINGEL (HRNG 10-2V159) [test, a , exId] | | |
| Utility1 | Name1 | [PER 201476] - KOPDAM- MERDYK 2 -- NOORDEINDE (OTL 10-1V142) [additional cable] | | |
| d69a4adc-4987-4b0a-a74b-08b929f2c642 | 16ef7f5a-6e3... | 123Start City -- 321End City | | |
| Utility1 | Name10011 | Amsterdam - Station 1 (1234) -- Station 2 ( 4321) | | |
| b002a24d-5fed-482e-863b-aa8691637699 | 4fa79457-db... | Arnhem - Fake 1c -- Fake 2c | | |
| Utility9 | Name9 | Arnhem - Main Micronet (150m) - Left -- Arnhem - Main Micronet (150m) - Right | | |
| DNV | Default | Arnhem - Start SCG1 -- Training DEWA - End SCG1 | | |
| Utility9 | Name10020 | Arnhem - Test Lab (SU 1) SLAVE | | |
| Utility9 | Name10020 | Arnhem - Test Lab (SU 2) SLAVE | | |

- **Possibility to set maximum value for PD data in 3D view** - Easier analysis for smaller clusters in 3D
- **Updating of landing page -** Clearer clickable area
- **Same time zone for all date/times in SCG Portal** - Date/times consistency based on the time zone setting of the user's computer instead of the region's time zone
- **Multi-core cables handling on Portal -** Overview add all the cores in one view in portal and CWI
- **Easier automatic processing of fault notifications -** Make reliable automatic processing of fault notification messages possible by adding identifiers for machine-to-machine communication for each circuit and RMU.
    - API versions prior to the current one will still function, but are now deprecated and will be decommissioned in the future. The following APIs are now deprecated, and their decommission dates are listed:
    - **New version of Inhousing v4 (CircuitsInhousing)** – v3 (DEPRECATED) will be decommissioned on 2024-07-01.
    - **New version of FirstLineSupport v2** – v1 (DEPRECATED) will be decommissioned on 2024-07-01.
    - **New version of DataExport v3 (CircuitsDataExport, ComponantDataExport)** – v2 (DEPRECATED) will be decommissioned on 2024-07-01.
    - Details on the new API versions can be found in the SCG Developer Portals SCG Portal (dnv.com) .

## Fixes

- 373906 – Top view chart is able to display a short lasting SCG warning
- 478126 – Default start date when creating a new cable configuration with no date overlap
- 480910 – No downsampling differences between CWI and portal charts
- 481271 – Station names are properly displayed in CWI component chart
- 494644 – New added circuit is visible on circuit list
- 499086 – Inconsistent icons in Portal and CWI for monitoring quality (also known as operational status).
- 526838 – The chart is not missing the 'Maximum PD detection sensitivity' dashline
- 541809 – SMS or email is sent based on the latest selection of contact page
- 545803 – Accurate translation for pop-up notifications based on selected language
